## LEARNING GUIDE

### SUBJECT

**203000021 - Statistical Analysis And Data Visualization**

### DEGREE PROGRAMME

20BC - Master Universitario En Biología Computacional

### ACADEMIC YEAR & SEMESTER

2021/22 - Semester 1

## Index

---

### Learning guide

1. Description.....	1
2. Faculty.....	1
3. Skills and learning outcomes .....	2
4. Brief description of the subject and syllabus.....	3
5. Schedule.....	5
6. Activities and assessment criteria.....	7
7. Teaching resources.....	9
8. Other information.....	10

## 1. Description

### 1.1. Subject details

Name of the subject	203000021 - Statistical Analysis And Data Visualization
No of credits	3 ECTS
Type	Optional
Academic year of the programme	First year
Semester of tuition	Semester 1
Tuition period	September-January
Tuition languages	English
Degree programme	20BC - Master Universitario en Biología Computacional
Centre	20 - E.T.S. De Ingeniería Agronómica, Alimentaria Y De Biosistemas
Academic year	2021-22

## 2. Faculty

### 2.1. Faculty members with subject teaching role

Name and surname	Office/Room	Email	Tutoring hours *
Raul Garcia Castro	2110	r.garcia@upm.es	Sin horario.
Antonio Jimenez Martin	2110	antonio.jimenez@upm.es	Sin horario.
Juan Antonio Fdez Del Pozo De Salamanca	2101	juan.fdezpozo.salamanca@upm.es	Sin horario.
Jacinto Gonzalez Pachon (Subject coordinator)	2101	jacinto.gonzalez.pachon@upm.es	Sin horario.

\* The tutoring schedule is indicative and subject to possible changes. Please check tutoring times with the faculty member in charge.

### 3. Skills and learning outcomes \*

#### 3.1. Skills to be learned

CE01 - Comprender las bases moleculares y las técnicas experimentales estándares más comunes en las investigaciones ómicas (genómica, transcriptómica, proteómica, metabolómica, interactómica, etc.).

CE04 - Utilizar diferentes bases de datos (incluidos los bigdata), conocer sus estructuras y ontologías, aplicar la estadística a su análisis, siendo capaz de utilizar herramientas de representación y visualización.

CE08 - Capacidad de integrar tecnologías y sistemas propios de la Inteligencia Artificial, con carácter generalista, y en contextos más amplios y multidisciplinares.

CE09 - Capacidad de interpretar los modelos de clasificación supervisada y no supervisada obtenidos al aplicar las técnicas de Aprendizaje Automático para un conjunto de datos.

CG02 - Familiarizarse con el trabajo y los métodos de la Biología Computacional en condiciones reales, adquiriendo la capacidad de diseñar aplicaciones/experimentos de forma independiente y describir, cuantificar, analizar y evaluar críticamente los resultados obtenidos.

CG05 - Que los estudiantes sean capaces de integrar conocimientos en el área de la Biología Computacional, de formular conclusiones, hipótesis o líneas de trabajo a partir de la información disponible, y de formarse una opinión fundamentada sobre las responsabilidades sociales y éticas vinculadas a la aplicación de sus conocimientos.

CT02 - Capacidad para aplicar el método científico para la resolución de problemas de forma efectiva y creativa.

CT06 - Capacidad para liderar y trabajar en equipos multidisciplinares y multiculturales en un contexto internacional.

CT07 - Ser capaz de manejar las tecnologías de la información y comunicación en un contexto profesional.

### 3.2. Learning outcomes

RA3 - Los estudiantes deben ser capaces de aplicar métodos estadísticos específicos adecuados

RA2 - Los estudiantes deben ser capaces de identificar metodologías apropiadas e inapropiadas para una situación determinada

RA1 - Los estudiantes deben entender conceptos específicos y procedimientos estadísticos

\* The Learning Guides should reflect the Skills and Learning Outcomes in the same way as indicated in the Degree Verification Memory. For this reason, they have not been translated into English and appear in Spanish.

## 4. Brief description of the subject and syllabus

---

### 4.1. Brief description of the subject

The course is a non-exhaustive review of techniques to convert a set of data into relevant information. Once relevant information is obtained, the next objective is to obtain the necessary knowledge to be able to make good decisions. The perspective of the course is double, both theoretical and applied. The course covers topics such as exploratory data analysis, summary statistics, data visualization, as well as models for decision-making. There will be an emphasis on the practical application of theory and methods, with extensive use of R.

### 4.2. Syllabus

1. Data Exploratory Analysis
  - 1.1. Univariate analysis
  - 1.2. Multivariate analysis
2. An introduction to Decision Theory
  - 2.1. Decision under certainty vs. decision under uncertainty
  - 2.2. Multi-criteria and multi-objective decision-making
  - 2.3. Collective decision-making
3. Data visualization
  - 3.1. Basic data visualization
  - 3.2. Models visualization
  - 3.3. Processes visualization

#### 4. Models selection

- 4.1. Principal component analysis
- 4.2. Factorial analysis
- 4.3. Correspondence analysis
- 4.4. Multidimensional scaling

## 5. Schedule

### 5.1. Subject schedule\*

Week	Face-to-face classroom activities	Face-to-face laboratory activities	Distant / On-line	Assessment activities
1	<b>Lesson 1</b> Duration: 02:00		<b>Lesson 1</b> Duration: 02:00	
2	<b>Lesson 1</b> Duration: 02:00		<b>Lesson 1</b> Duration: 02:00	
3	<b>Lesson 2</b> Duration: 02:00		<b>Lesson 2</b> Duration: 02:00	
4	<b>Lesson 2</b> Duration: 02:00		<b>Lesson 2</b> Duration: 02:00	
5	<b>Lesson 3</b> Duration: 02:00		<b>Lesson 3</b> Duration: 02:00	Lecture notes about the theoretical content of lesson 2  Continuous assessment Not Presential Duration: 00:00
6	<b>Lesson 3</b> Duration: 02:00		<b>Lesson 3</b> Duration: 02:00	
7	<b>Lesson 3</b> Duration: 02:00		<b>Lesson 3</b> Duration: 02:00	
8	<b>Lesson 3</b> Duration: 02:00		<b>Lesson 3</b> Duration: 02:00	
9	<b>Lesson 3</b> Duration: 02:00		<b>Lesson 3</b> Duration: 02:00	
10	<b>Lesson 3</b> Duration: 02:00		<b>Lesson 3</b> Duration: 02:00	Practical report about the content of lessons 1 and 3 on a specific data set  Continuous assessment Not Presential Duration: 00:00
11	<b>Lesson 4</b> Duration: 02:00		<b>Lesson 4</b> Duration: 02:00	
12	<b>Lesson 4</b> Duration: 02:00		<b>Lesson 4</b> Duration: 02:00	Practical report about the content of lesson 4 on a specific data set  Continuous assessment Not Presential Duration: 00:00

13				
14				<p>Practical report about the content of lessons 1, 3 and 4 on a specific data set</p> <p>Final examination</p> <p>Not Presential</p> <p>Duration: 00:00</p>
15				
16				
17				

Depending on the programme study plan, total values will be calculated according to the ECTS credit unit as 26/27 hours of student face-to-face contact and independent study time.

\* The schedule is based on an a priori planning of the subject; it might be modified during the academic year, especially considering the COVID19 evolution.

## 6. Activities and assessment criteria

### 6.1. Assessment activities

#### 6.1.1. Continuous assessment

Week	Description	Modality	Type	Duration	Weight	Minimum grade	Evaluated skills
5	Lecture notes about the theoretical content of lesson 2		No Presential	00:00	20%	5 / 10	CE08 CT02 CG05
10	Practical report about the content of lessons 1 and 3 on a specific data set		No Presential	00:00	40%	5 / 10	CT06 CE08 CE04 CT02 CE01 CE09 CG05 CG02 CT07
12	Practical report about the content of lesson 4 on a specific data set		No Presential	00:00	30%	5 / 10	CE04 CT02 CT06 CE09 CG05 CT07

#### 6.1.2. Final examination

Week	Description	Modality	Type	Duration	Weight	Minimum grade	Evaluated skills
14	Practical report about the content of lessons 1, 3 and 4 on a specific data set		No Presential	00:00	100%	5 / 10	CE08 CE04 CT02 CE01 CE09 CG05 CG02 CT07

### 6.1.3. Referred (re-sit) examination

Description	Modality	Type	Duration	Weight	Minimum grade	Evaluated skills
Practical report about the content of lessons 1, 3 and 4 on a specific data set		Face-to-face	00:00	100%	5 / 10	CE04 CT02 CE08 CE01 CE09 CG05 CG02 CT07

### 6.2. Assessment criteria

Regular attendance to class is mandatory to apply the continuous evaluation. Attendance represents a 10% in the final score.

Both practical reports and lecture notes of the theoretical content will be evaluated according to their completeness, clarity, coherence and originality, as well as the ability to interconnect ideas.

The final grade of the course will be obtained from the results obtained in the activities carried out according to the percentage detailed in the table of Summative Evaluation.

### Extraordinary examination

The score in extraordinary examination will be obtained by the same concepts detailed in the table of Summative Evaluation, except the participation in class. The 10% corresponding to this activity is transferred to the practical reports, weighted with 45% and 35% respectively.

## 7. Teaching resources

### 7.1. Teaching resources for the subject

## 8. Other information

### 8.1. Other information about the subject

The health situation caused by the COVID-19 pandemic forces to restrict the capacity of the classrooms and therefore the Board Team of ETSIINF has decided that the teaching of this semester will be of mixed presence. If the number of students who choose the course requires it, turns will be established, so that each week one turn will attend class in the classroom (column "classroom activity" of the schedule), while the rest will be connected to the class remotely (column "tele-teaching"). Each week it will be a different turn that comes to the classroom. If sanitary conditions improve and face-to-face classes can be taught normally, all students will go to classrooms to receive the classes indicated in the column "classroom activity". If, on the contrary, the sanitary conditions worsened, all the students would go on to connect to the remote classes of the column "tele-teaching". In this situation, the planned face-to-face continuous assessment tests would be carried out online, without the need to modify this guide.
